AGENT GUARD

Control Plane for the Agentic Enterprise

AI agents are becoming digital workers.
Who controls them?

iQOO HACKATHON 2026 / PRODUCTIVITY

ISLAND

THE PROBLEM

ISLAND

AI agents are becoming workers. But who controls them?

Agents access tools, retrieve information and perform organizational actions.

WHO made the request?

WHAT did they access?

WHAT action was attempted?

IS it permitted?

WHAT happened afterward?

AI agents need identity, permissions and accountability.

From AI Assistants to AI Workers

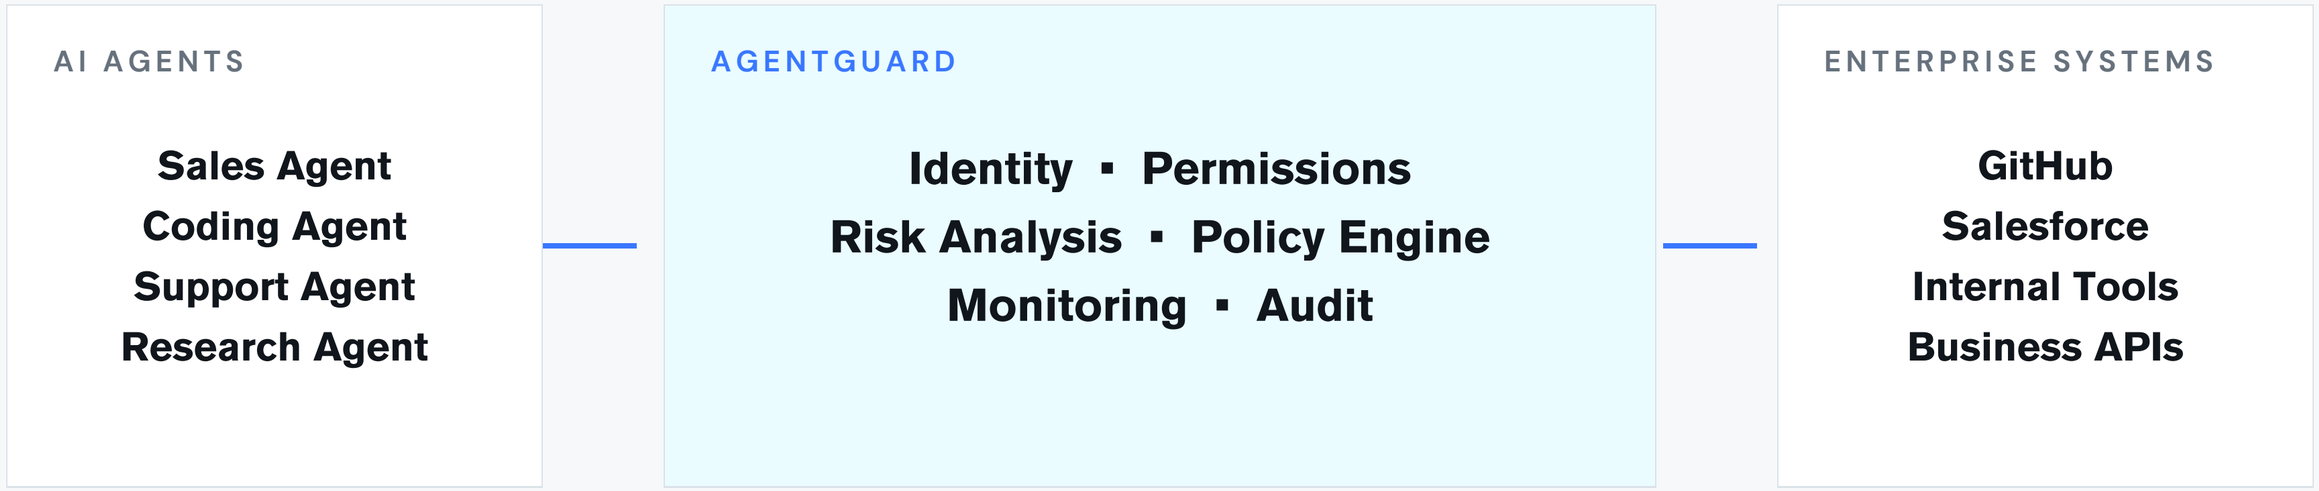

More autonomy requires more control.

OUR SOLUTION

ISLAND

Meet AgentGuard.

A centralized control plane for AI agents.

Agents perform the work. AgentGuard controls the work.

CONTROL FLOW

ISLAND

One action. Six layers of control.

01 **IDENTIFY**

Verify which agent is making the request.

02 **AUTHORIZE**

Check what the agent is allowed to access.

03 **ANALYZE**

Evaluate the requested action and risk.

04 **DECIDE**

Allow, restrict or block.

05 **EXECUTE**

Only approved actions reach the target system.

06 **AUDIT**

Record the action for accountability.

LIVE SCENARIO

ISLAND

When an AI agent crosses the line.

Sales-Agent-01

REQUEST / Access Salesforce customer records

PERMISSION READ_CUSTOMER_PII
RISK HIGH

Policy: Sensitive customer information cannot be accessed by this agent.

ACCESS BLOCKED

✓ Identity verified
✓ Policy evaluated
⚠ High-risk action detected
✕ Unauthorized action blocked
✓ Audit event recorded

CAPABILITIES

ISLAND

Everything AI agents need to work responsibly.

AGENT IDENTITY

A distinct identity for every AI agent.

PERMISSION CONTROL

Control exactly what each agent can access.

RISK DETECTION

Detect sensitive or risky actions.

POLICY ENGINE

Automatically allow, restrict or block.

REAL-TIME MONITORING

See what agents are doing.

AUDIT LOGS

Maintain a transparent history of actions.

PRODUCT

ISLAND

One control center. Every agent.

12	8	2	7
ACTIVE AGENTS	CONNECTED TOOLS	HIGH-RISK ACTIONS	BLOCKED ACTIONS

AGENT ACTIVITY

Sales-Agent-01	Salesforce	BLOCKED	HIGH RISK
Code-Agent-02	GitHub	ALLOWED	LOW RISK
Support-Agent-04	CRM	REVIEW REQUIRED	

WHY IT MATTERS

ISLAND

Productivity without losing control.

MOVE FASTER

Deploy AI agents across workflows with confidence.

REDUCE RISK

Prevent unauthorized or high-risk actions.

STAY ACCOUNTABLE

Know what every agent did and why.

Autonomous AI should increase productivity — not decrease control.

We are not another AI agent.

TYPICAL AI AGENT

Understand → Generate → Act

AGENTGUARD

Identify → Authorize → Analyze → Decide → Act → Audit

Agents perform the work. AgentGuard controls the work.

ISLAND

From prototype to agentic infrastructure.

WORKING PROTOTYPE

- ✓ Agent onboarding
- ✓ Agent identity
- ✓ Connected tools
- ✓ Permission checks
- ✓ Risk evaluation
- ✓ Allow / Block decisions
- ✓ Monitoring
- ✓ Audit logs

```
REQUEST → AI AGENT → AGENTGUARD
Identity → Policy → Risk → Decision
ENTERPRISE TOOL → AUDIT LOG
```

Prototype validation only — no production deployment claims.

ISLAND

IF AI AGENTS ARE THE NEW WORKERS,

AGENTGUARD is their control plane.

Let AI work. Keep humans in control.
